

(This feature will work in jmeter 3.0 and later ver.)

Step 1 : Create Test Plan and save it (and close).

Step 2 : Open command line and change dir to jmeter/bin

Step 3 : Execute command:

to create report at the end of the test

```
jmeter -n -t "location of the jmeter script" -l "location of  
result file"
```

```
-e -o "location of the output folder"
```

create report from a standalone csv file

```
jmeter -g "location of csv file" -o "location of output folder"
```

Step 4 : Analyse HTML (Dashboard) Reports
